Stem Solutions Completes Lab Fit Out for Evelo Biosciences in Cambridge, MA

Cambridge, MA, August 28, 2018, For Immediate Release: Stem Solutions LLC, a local construction company, recently completed a project for Evelo, a BioScience company located in Cambridge, MA. Stem Solutions co-founder Ed St. Peter summarized the project, "In under five weeks we designed and fabricated a lab bench system to fit Evelo's budget, shipped and installed."

The turnaround time on projects of this size typically run 8-10 weeks, so Stem Solution's ability to supply and configure innovative lab solutions on a tight timeframe is something they are becoming known for in the industry. "I needed to quickly provide some competitive pricing options for my client and still ensure the project could meet my client's installation deadline," said Angela Ciramella, the Sr. Project Manager from Dowling Houy, who also worked on the Evelo project. "I was completely impressed with the Stem Solutions team's attention to detail and handling of the entire project," she continued.

"I was very happy with [Stem Solutions](#)' ability to meet our very strict timeline and budget constraints on this project. They were creative in coming up with high quality options for us very quickly," said Steve Milley, Evelo's Sr. Manager of Facilities. The bench system detailed in the pictures was custom fabricated by Stem Solutions and each hold 1/2 ton. They were manufactured to be either 6 feet or 8 feet in length with varying depths. They are adjustable to accommodate different work heights by the end user. The benches had additional options added depending on use: attached shelving above with fixtures for services or hanging cabinets for storage.

Evelo Biosciences is dedicated to improving the lives of patients globally through the development of monoclonal microbials.

Stem Solutions LLC specializes in providing casework, systems, fume hoods, fixtures and equipment for commercial and educational laboratories. For more information they can be contacted at itb@labfitout.com or 617-826-6111.
